

Environment Websites for Schools

<http://www.carboncontrol.org.uk/default.aspx>

The RSA site for involving pupils and their schools in carbon control is a very interactive site. It has a carbon calculator for pupils and an 'environment' blog for pupils to suggest carbon control initiatives/ projects with prizes for the best.

<http://www.suschool.org.uk>

The Sustainable Schools website by the Alternative Technology Centre has an excellent page on each topic of sustainability with content covering education, how to apply the principles in your home/ school and how to access additional information. Has links to 121 websites (listed under the 'links' heading) on school environment education and related subjects.

<http://www.eco-schools.org.uk/why/school-environment.htm>

A page on the Eco-schools website that lists activities to improve the environment footprint in schools.

<http://www.environment-agency.gov.uk/fun/>

A fun part of the Environment Agency's website that is aimed at educating kids on different aspects of the environment.

<http://www.teachernet.gov.uk/sustainableschools/>

Part of the teachernet website which has a focus on how to embed sustainability at the heart of school life.

<http://www.teachernet.gov.uk/growingschools/>

Part of the teachernet website which has a focus on the government programme 'Growing Schools' which has a focus on food, farming and the countryside.

<http://www.managenergy.net/kidscorner/brightideas.html>

A European Commission website that highlights a variety of activities designed to stimulate children's enthusiasm for energy saving, renewable energy and sustainable mobility.

<http://www.recyclezone.org.uk/>

Has the theme - reduce, reuse and recycle. It is aimed at kids and has activities and waste related games.

<http://www.wightgreencentre.demon.co.uk/energy.html>

Lots of energy saving ideas for kids.

<http://www.kidsplanet.org/>

A fun website for kids concentrating on wildlife species endangered by global warming
